\*\*\* ATTENTION: YOU MUST RE-TORQUE AFTER 50 TO 100 MILES! \*\*\*

After a wheel has been installed, YOU MUST recheck the torque after 50 to 100 miles of operation, and re-tighten lug nuts, if necessary, to the manufacturer recommended torque using the proper sequences. It is recommended that a torque check be made part of a vehicle's maintenance program, or done at 10,000-mile intervals, whichever comes first. Individual fleet experience may dictate shorter intervals. RE-TORQUE SERVICE IS OFFERED AT OUR STORE LOCATIONS, BUT REMAINS THE SOLE RESPONSIBILITY OF THE VEHICLE OWNER
