Task: 1 08-200

Diagnose and Advise

Department: SERVICE

Complaint:

LOW AIR BUZZER STAYS ON WITH KEY ON ENGE OFF NO MATTER HOW MUCH AIR PRESSURE

Correction:

459 Performed diag and followed wire diagram. Removed dash cluster and found check trans connection in back of cluster not making good connection, causing switch on ground circuit of buzzer to be closed when it is supposed to be open. Installed connector to the locked position. Checked for proper operation. Everything works as it should.
